## DISCOVER THE POWER OF WHELCO RPM

YOUR PARTNER IN INDUSTRIAL MOTOR RELIABILITY & PLANT MAINTENANCE

In the demanding world of industrial motors, reliability and efficiency are paramount. At Whelco RPM, we understand the critical role your equipment plays in maintaining seamless operations. That's why our Reliability and Plant Maintenance (RPM) services are designed to keep your machinery running smoothly, minimizing downtime and maximizing productivity. Here's why Whelco RPM should be your go-to choice for comprehensive field services in the industrial motor industry.

### WHY CHOOSE WHELCO RPM?

#### **Comprehensive Services**

From rotating equipment to field services and beyond, we offer a full spectrum of turnkey solutions tailored to your specific needs.

#### **Efficient Execution**

Our disciplined, multi-phased approach ensures meticulous planning, scheduling, staffing, and execution, guaranteeing minimal downtime and maximum productivity.

#### **Proactive Planning**

We start well in advance, working with clients to develop progressive implementation plans and conducting post-project performance reviews to continually improve our processes.

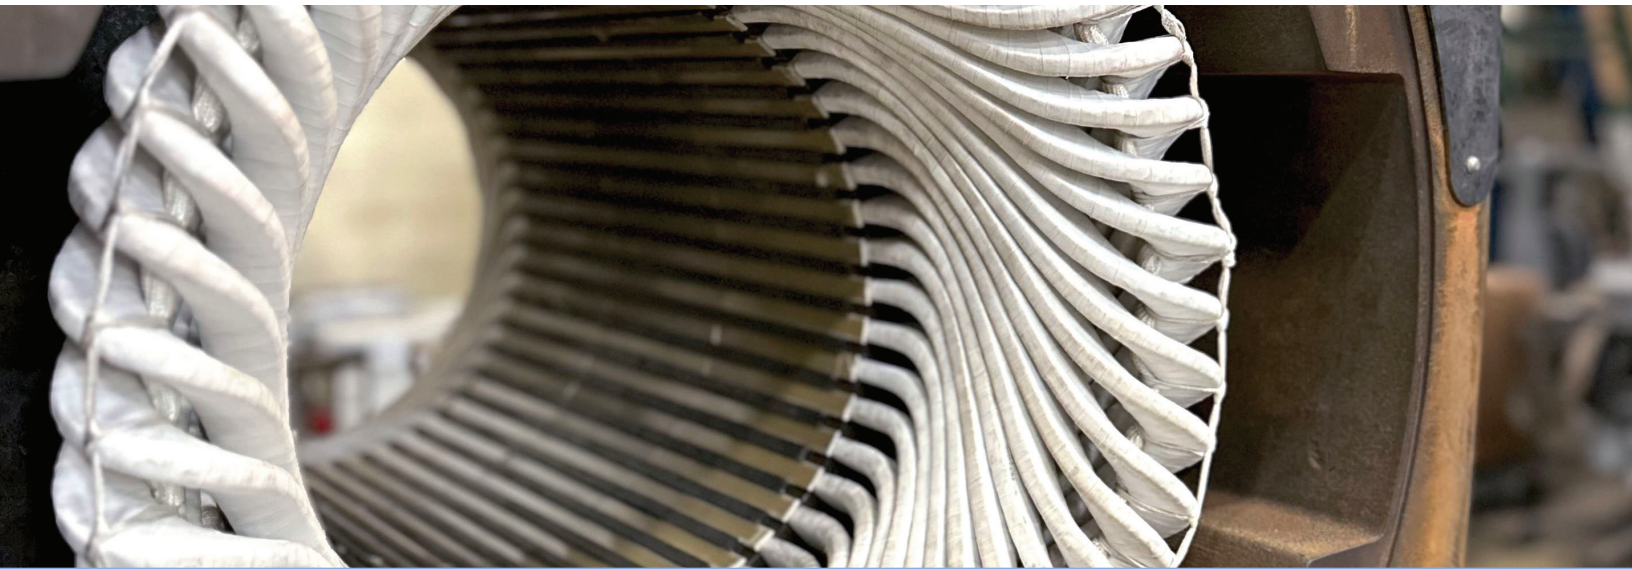

#### **Experienced Teams**

Our seasoned professionals bring a wealth of expertise to every project. Whether it's a quick in-shop repair service or a complex on-site installation, our team is equipped to handle any challenge. We pride ourselves on delivering top-notch service, no matter the task.

### OUR CERTIFICATIONS INCLUDE:

- Level 2 Vibration
- Level 2 Infrared Thermography
- Transformer Management Testing & Maintenance
- Level 1 Ultrasound
- PdMA Multi-Channel Analyzer
- NFFPA 70E
- MSHA
- Confined Space

## OUR TURNKEY SERVICES INCLUDE:

### ***Quick Turnaround on In-Shop Repair Services***

Fast and reliable repair services to get your equipment back up and running in no time.

### ***Online and Offline PdMA Motor Circuit Testing***

Comprehensive testing to ensure the reliability of your motors.

### ***On-Site Laser Alignment***

Precise alignment services to prevent equipment misalignment and ensure optimal performance.

### ***Motor Surveys***

Detailed surveys to assess the condition and performance of your motors.

### ***Removal and Installation of Rotating Equipment and Drives***

Complete removal and installation services for seamless equipment transitions.

### ***Brush Inspection and Replacement***

Regular inspections and replacements to maintain motor efficiency and prevent downtime.

### ***Startup Assistance with Vibration Analysis and Motion Amplification***

Expert startup services to ensure your equipment runs smoothly from the get-go.

### ***Full Reporting of All Testing and Final Condition Checks***

Comprehensive reports that provide a clear picture of your equipment's health.

### ***Thermography Services***

Addressing electrical challenges before they impact your equipment.

### ***On-Site Balancing***

Precise balancing services to extend the life of your equipment and prevent premature wear and tear.

### ***Ultrasonic Lubrication***

Ensuring precision application and reduced wear for your equipment.

### ***Drive Commissioning***

Ensuring your drive is properly connected, configured for your operation, and thoroughly tested.

### ***Transformer Testing***

Evaluate the performance and condition of transformers using diagnostic tests to ensure optimal operation and prevent failures.

### ***Remote: Onsite Vibration Services***

Maximize equipment performance with our expert Remote and Onsite Vibration Services—detect issues early and prevent costly downtime.

## EXPERIENCE THE WHELCO RPM DIFFERENCE

Choosing Whelco RPM means partnering with a team dedicated to ensuring the reliability and efficiency of your industrial motors. With our comprehensive services, experienced professionals, and commitment to proactive planning and efficient execution, we are here to support your operations every step of the way.
